

CrowdMaster 8' HD Barricade

Heavy Duty Crowd Control

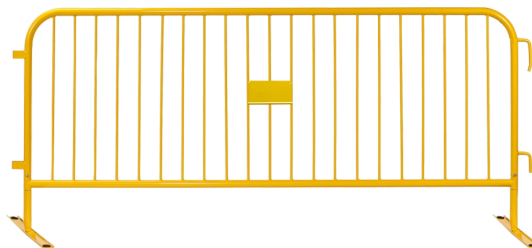

PRODUCT SPEC SHEET

The CrowdMaster 8' HD is made from heavy duty 16 gauge steel with 1.5" diameter frame tubing. Its 21 close-spaced uprights are fully inserted into the frame before welding for outstanding strength, and the tight 3 3/4" spacing keeps children from getting stuck between them. Order it hot dip galvanized for maximum weather resistance, or powder coated in a range of colors. A twin hook and loop interlock connects barricades into a line of any length.

Match the feet to the job: Flat for smooth surfaces such as tarmac, Bridge for uneven ground such as grass, Heavy Duty for maximum strength, ADA compliant for the lowest trip hazard, and Roller for easy movement.
