

CrowdMaster Plus

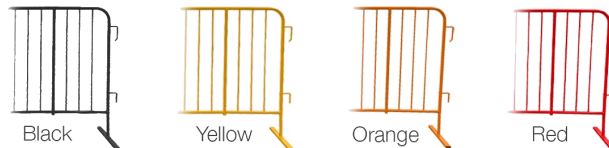

1" Diameter Frame Barricade · Heavy Duty, Low Cost Crowd Control

PRODUCT SPEC SHEET

Built around a 1" OD frame of 16 gauge, hot dip galvanized steel, the CrowdMaster Plus delivers the toughness of a permanent outdoor barricade without the heavy-duty price tag. Its 21 uprights sit just 3.75" apart and are fully inserted into the frame before welding for exceptional rigidity. Set the feet outboard for standard lines, or inboard for added support against climbing and to run barricades at 90° angles. Choose Heavy Duty flat feet for maximum durability, or Bridge Feet for uneven ground such as grass. An industry-standard hook-and-loop interlock lets you connect units into a barrier line of any length.
